Create and Submit a Repository Application Termination Report

A Termination Report is submitted only if all activity governed by the repository’s procedures will end permanently. A Termination Report can be initiated by repository personnel with edit rights listed on the approved application, but it can only be submitted for review by the repository director. After submission, the Termination Report is locked and no further changes can be made unless requested by a reviewer. Only one Termination Report or Continuing Review submission for a Repository Application can be in progress at a time.

This procedure contains two parts: Creating a Repository Application Termination Report and Submitting a Repository Application Termination Report.
