

# Tapped

| Materials   | Pitch      | Vibration picture  |
|---|------------|--|
|    | High       |    |
|   | In-between |   |
|  | Low        |  |

Claim:

Heavier bottles vibrate more slowly when tapped.

Claim: When a material makes sound, the greater the amount of vibrating material, the lower the pitch.
