

JAVA IV:
EAST JAVANESE TEMPLES I
(5401-5500)

This set provides thorough coverage of the major temple complex dedicated to Siva at Panataran, as well as Candi Singasari, the colossal guardian figure near Singasari, and Candi Jago. Although the set was originally intended to cover the majority of the better known temples in East Java, it was decided to limit the set to the aforementioned monuments in order to avoid superficiality in our coverage. Documentation of other East Javanese temples will be offered in a future set. The current set is the result of a photographic expedition to Indonesia in the summer of 1983. The material gathered on the expedition forms the basis of this and several other sets, some forthcoming. The expedition was organized by the ACSAA Color Slide Project of The University of Michigan, with the help of the Center for South and Southeast Asian Studies and the Department of the History of Art. Expedition members included Dr. Walter Spink, Dr. Suresh Vasant, Patrick Young, Paul Berry, Betsy Horton, Stephen Markel, Garrett Solyom, and Bambang Hoedoyo. Thanks are due to the National Research Centre of Archaeology and the Directorate of Protection and Development of Historical and Archaeological Heritage of the Government of Indonesia, the Ford Foundation, the Social Science Research Council, the Asian Cultural Council, and the Southeast Asia Art Foundation for help and support. A few particularly fine views in the set are kindly supplied by Dr. Cal French, The University of Michigan. All slides copyright Asian Art Archives The University of Michigan.
