# How did you do?

## Check out the Answers To The Alcohol Quiz!

1. FALSE - Alcohol is a mood altering drug that depresses bodily functions.
2. FALSE - Nothing but time will sober a drunk.
2. TRUE - The effect that alcohol has on you is dependant on your sex, your weight, how fast you metabolize alcohol, the situation, your mood, and presence of food in the stomach. If you are a woman, the effects also depend on the time of your menstrual cycle and if you are on the birth control pill.
4. FALSE - The consumption of enough alcohol will cause death. This level is dependant on the individual.
5. FALSE - Often these charts only take into account your weight and the number of drinks that you have drank. These charts can be used as a guideline, but there are no guarantees to their validity in regards to you.
6. FALSE - Encouraging the semiconscious person to vomit could cause choking and/or aspiration.
7. TRUE - Women respond more quickly to alcohol due to their smaller body size and body fat distribution, a decreased amount of alcohol metabolizing enzyme, and due to increased hormonal changes.
8. TRUE – In 1998, 2,210 youth died in alcohol-related crashes - 35.8 percent of their total traffic fatalities. Most of these are at low levels of BAC (between .01 and .09).
9. TRUE AND FALSE - Alcohol decreases your inhibitions, which factor into an increased sexual drive. However, alcohol decreases sexual functioning and is linked to the reduction of the male hormone testosterone.
10. FALSE - NEVER LEAVE AN INTOXICATED PERSON ALONE. Stay with the person and frequently assess them for alcohol poisoning.
