The Central Africa Regional Program for the Environment (CARPE) is a USAID-sponsored consortium of agencies, including The World Resources Institute, The World Wide Fund For Nature–U.S., and The Nature Conservancy. It provided partial funding to complete that offered by Yale University for this volume, and for the conference on which it is based.

Note to Readers

This volume is based on an international conference, "Natural Resource Use Relations in the Trinational Sangha River Region of the Northwest Congo Basin," held at Yale University in September 1997. In recognition of the bilingual context in which conservation occurs in the three countries of the Sangha region — Cameroon, Central African Republic, and Congo — all sessions of the conference were conducted simultaneously in French and English. This publication, which is a complete rendering of the conference papers and discussion sessions, is available in its entirety in both French and English. For information on ordering the volumes either separately or together, please contact <http://www.yale.edu/forestry/resources> or <http://www.yale.edu/sangha> or e-mail sangha@yale.edu
