

MCTP PUBLIC LECTURE

Sponsored by the Michigan Center for Theoretical Physics with refreshments

Jonathan I Lunine, Professor of
Planetary Science and Physics
(*University of Arizona, Tucson AZ*)

Thursday, March 27th, 2008
Lecture Hall #1400 Chemistry Bldg
930 N. University, Ann Arbor, MI 48109
7:00PM – 8:00PM

“Exploring the Outer Solar System: Present and Future”

With the Cassini mission moving into its extended phase, it is time to consider the next steps in exploring the diverse worlds around Jupiter and Saturn –and beyond. This part of our solar system is active, diverse, and might hold clues to whether life is a cosmic imperative.
