When the Department of Public Safety (DPS) determines there is an active emergency in which the public safety of the campus may be at risk, we can send an urgent notification through the UM Emergency Alert system (http://www.umemergencyalert.umich.edu/). We encourage you to sign up to receive a personal text or voice message so you know how to quickly take action to protect yourself.

HOW DO I SIGN-UP TO RECEIVE A TEXT OR VOICE MESSAGE?
2. Select Employee Business.
   In the Campus Personal Information section, select UM EMERGENCY ALERTS.
   Add your UM Emergency Alert phone numbers, and click Save.
   Click “Help” at the top of the Wolverine Access page for step-by-step instructions.

THE UM EMERGENCY ALERT IS VERY DIFFERENT FROM A CRIME ALERT.
Examples of when you would receive a special emergency alert message are:
-- When a person actively shooting a weapon is on the loose
-- When a tornado is predicted to strike the campus area
-- When a major hazardous material spill is impacting a large portion of campus Localized incidents within a building (such as a small fire or hazardous material spill in a lab) probably won’t result in the sending of a campus-wide alert message.

More information is available at http://www.umemergencyalert.umich.edu/.

HAVE A COMMENT OR QUESTION?
If you have a comment about this message or the emergency alert, or if you have questions that aren’t answered by reviewing the website, please send e-mail to um-emergency-alert@umich.edu.
