Subject: Application of Phi Gamma Delta Colony at The University of Michigan to become a Chapter

Gentlemen:

The Colony of Phi Gamma Delta has emerged quickly to become one of the leading fraternities at the University of Michigan.

The young men of the Michigan Colony have distinguished themselves by exhibiting outstanding qualities, of which they should be justly proud.

They have set goals and achieved them, step by step.

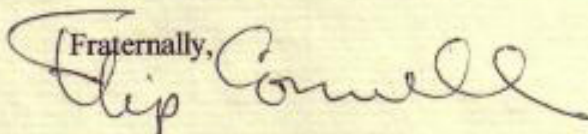

From superior GPA's to leading in intramural athletics, they have met the criteria necessary to succeed.

It is with great, renewed, pride that I can recommend that this Colony be made a Chapter of Phi Gamma Delta.

There is more to it than simply meeting requirements and creating brotherhood. This group has demonstrated responsibility for their actions, the ability to perpetuate their principles through growth, and a desire to be a good neighbor. People who meet them, like them - individually and collectively. Women express that they are polite. A neighbor spoke favorably about their commitment to control their potential noise in the neighborhood. Sororities comment about the respect accorded them by the Fijis. These are uncommon traits among fraternities.

Interaction with Alumni has been gratifying, stimulating, and inspiring in the rebuilding process. It has been my privilege to work closely and regularly with these men from the start - to witness their response to challenge, and to observe their common sense in striving for excellence. They are determined that their legacy be remembered as the ones who put our fraternity back in the forefront at Michigan.

Fraternally,

Alpha Phi - 1950
