Grading Scale and Example of Final Grade Computation

CCD 102, Foundations of Early Childhood Education consists of two exams, eight early childhood program site observations, discussion board forum contributions and one philosophy of teaching statement. The eight early childhood program site observations are averaged for grade calculations. Each assignment is worth 100 points or 20% of the overall course grade. To calculate your grade add all your points together and divide by 5. From 500 total possible points dividing by five brings the points inline with the 100 points/4.0 grading scale below.
