AC213: Web Project Final Turn-In

Final Submission Due: Friday, December 15 by 11:59 PM EST
Reflection / Evaluation Papers Due: Sunday, December 17 by 5:00 PM EST

Use the SSH Secure File Transfer Client (or Fugu) to upload your new and changed files required for this assignment (including the images used in your website) to your web space. Please make sure EVERYTHING (links, images, citations, notes, etc.) works perfectly on the web! This is the final turn-in! Check the AC213 website to make sure you have completed ALL the assignment requirements, as well as the comments you received from Professor Cotera from Assignment #3. You may also want to consider using other systems (Windows/Macintosh) or other browsers (such as Mozilla Firefox or Safari) to verify your site's functionality.

Once you’ve checked that everything on your website works correctly on the web (including on a computer not on campus), email <mcotera@umich.edu> and <mgsmith@umich.edu> with your project title, your URL (that you have fully tested), and the names of all group members. There should not be any attachments to this email. Only one email per group is necessary, but you must CC (carbon copy) your other group members.

IMPORTANT: Within 48 hours of completing the final submission, but no later than Sunday, December 17 by 5PM, each member of the group is required to submit a two-page, 12-point text, double spaced project evaluation consisting of answers to the following questions:

- How did your group divide up the work for the project?
- Did each member contribute his or her fair share? Give a letter grade to each your group members (including yourself).
- Did you take advantage of the web consultant’s services? If so, were they helpful?
- How useful was this project as a learning experience for you?
- How would you suggest modifying the project assignment in future courses?

Your project evaluation should be submitted to the AC213 Ctools site (as a Microsoft Word attachment). You will not receive a grade for your group project until your evaluation is submitted to Ctools. You’re done!

If you have any additional questions, please contact <mgsmith@umich.edu> as soon as possible. As the availability of the web consultant cannot be guaranteed as the assignment deadline approaches, you are advised to begin or at least practice and test this process as soon as possible.

The web consultant will not be able support you easily if you choose to use web creation software other than Dreamweaver.
