Internship Service Learning Form

Service Learning involves consistent participation and contributions centered on community involvement. Service learning is more than voluntarism as it should include active participation with community-based organizations on projects to improve human well-being. Activities may include tutoring, community outreach and education, mentoring, serving in various capacities as a leader or counselor and co-worker, etc. For a 1 credit internship the student participates in a community based non-profit or not-for-profit program on a consistent basis (1-4 d/wk) over 8-14 weeks equivalent to a minimum of 65 total hours.

Name of Sponsoring Organization:
______________________________________________________________________________
